TEAMWORK REPORT

Smart Restaurant - QR Menu Ordering System

Team Members:

- **Nguyễn Minh Hiếu** (23120124) - Team Lead & Customer App Architect
- **Huỳnh Thái Toàn** (23120175) - System Architect & Payment Specialist
- **Phạm Quốc Nam Anh** (23120111) - Backend Specialist & Reporting

1. COLLABORATION OVERVIEW

Our team utilized a modern agile workflow to develop the Smart Restaurant system. We collaborated through:

- **Git & GitHub:** Central repository for code management, utilizing feature branching and Pull Requests for code review.
- **Discord:** Constant communication for rapid problem-solving and synchronization.

2. MEMBER CONTRIBUTIONS & RESPONSIBILITIES

Contribution Summary

Member	Focus Areas	Key Deliverables
Nguyễn Minh Hiếu	Customer Mobile App / Real-time Systems	End-to-end Ordering flow, WebSocket tracking, Fuzzy Search, Client-side Caching.
Huỳnh Thái Toàn	Admin Dashboard / Payment Integration	Database Schema, RBAC, VNPay Integration, Kitchen Display System (KDS).
Phạm Quốc Nam Anh	Reports / Backend Infrastructure	Sales Reporting Engine, QR Generation, Backend modularization.

3. TECHNICAL COLLABORATION DETAILS

3.1 Version Control Strategy

We adopted a **Trunk-Based Development** approach:

- **Single Source of Truth:** The team committed directly to the `main` branch to ensure rapid integration and avoid complex merge conflicts.
- **Experimental Branches:** Short-lived branches were occasionally used to isolate and test advanced or experimental features before integrating them back into the main trunk.
- **Continuous Integration:** By working primarily on `main`, we maintained a high-velocity development cycle with constant visibility into the project's current state.

3.2 Feature Integration Workflow

- **Frontend-Backend Sync:** Hiếu and Toàn collaborated closely on the Order API and WebSocket protocols to ensure live updates worked seamlessly across both the Customer and Staff apps.
- **Database Schema Design:** Toàn designed the initial schema, which was then iteratively refined by the whole team as new requirements (like Modifiers and Reports) emerged.
- **Deployment:** The team worked together on the `Procfile` and deployment configurations to ensure the project was stable on public hosting environments.

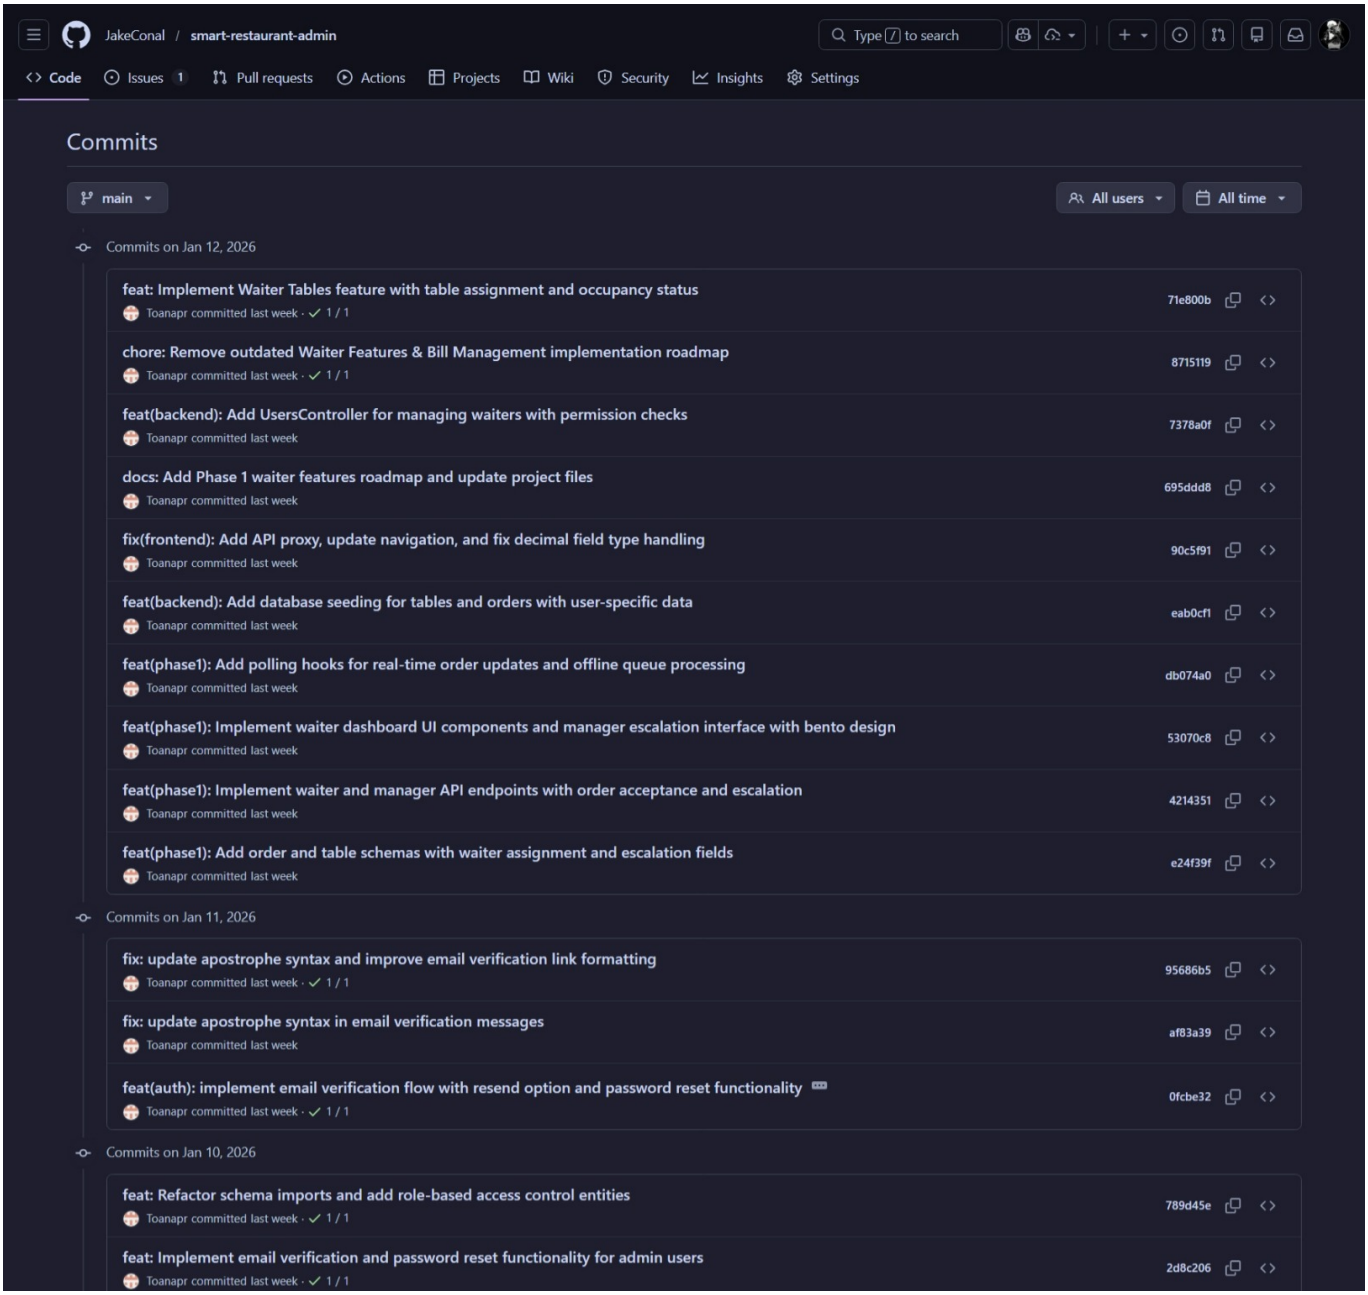
4. GIT COMMIT STATISTICS

The following is a summary of our team's activity on the GitHub repository.

Commit Frequency by Member

- **Nguyễn Minh Hiếu (JakeConal):** ~86 commits
- **Huỳnh Thái Toàn (Toan Huynh):** ~79 commits
- **Phạm Quốc Nam Anh (Nam Anh):** ~12 commits

Evidence of Collaboration (GitHub Screenshots)



feat: apply fuzzy search in customer app
JakeConal committed last week · 2 / 2 — Verified — 184f292

feat: Refactor JWT authentication to use ConfigService for secret management and streamline guard implementations
Toanapr committed last week · 1 / 1 — ac56e5c

feat: Enhance admin authentication with role-based access control and permissions
Toanapr committed last week — 35cce50

feat: Add database schema for user roles, permissions, and credentials
Toanapr committed last week — d0e1faf

feat: Implement admin authentication module with login and signup functionality
Toanapr committed last week · 1 / 1 — f531e72

Commits on Jan 9, 2026

feat: Implement menu caching utility to optimize API calls
JakeConal committed last week · 2 / 2 — Verified — 50fd8d6

feat: Implement password reset functionality with token validation
JakeConal committed last week · 1 / 1 — Verified — 37b6af5

feat: track individual item status within an order
JakeConal committed last week · 2 / 2 — Verified — 5f5b369

feat: Email verification link sent on signup in customer app
JakeConal committed last week · 1 / 1 — Verified — c171489

feat: Add password complexity validation and strength indicator for login and profile pages
JakeConal committed last week · 2 / 2 — Verified — 66675cf

feat: Implement password complexity validation for change password and sign-up processes
JakeConal committed last week · 1 / 1 — Verified — 9ebfbe7

feat: Integrate order history API and enhance order data structure in profile page
JakeConal committed last week · 2 / 2 — Verified — 2d87380

feat: Add FAQ section with collapsible answers in profile page
JakeConal committed last week · 2 / 2 — Verified — 1f81ef6

feat: Enhance profile picture handling with improved error handling and caching
JakeConal committed last week · 1 / 1 — Verified — 2bd7393

feat: Implement change password
JakeConal committed last week · 1 / 1 — Verified — 235f981

feat: Implement order tracking and payment functionality
JakeConal committed last week · 1 / 1 — Verified — f5ba3e9

Commits on Jan 8, 2026

fix: correct query builder logic for fetching reviews by restaurant ID and reset review state on item ID change
JakeConal committed 2 weeks ago · 1 / 1 — Verified — 6346365

refactor: remove favorites page and update menu item fetching logic
JakeConal committed 2 weeks ago · 2 / 2 — Verified — 3b50fed

feat: enhance cart and menu pages with improved UI, URL state management, and item details display
JakeConal committed 2 weeks ago · 2 / 2 — Verified — 308897e

feat: enhance photo handling in menu service and item detail page; add swipe functionality for photo gallery
JakeConal committed 2 weeks ago · 1 / 1 — Verified — 1cf9c7f

Commits on Jan 19, 2026

feat: Enhance table service token verification and update login page token handling; add database setup scripts and sample data
JakeConal committed 18 minutes ago · 1 / 1 — Verified — fc8a540

Commits on Jan 18, 2026

feat: Add a comprehensive collection of agent skills for document processing, design, and development tasks.
Toanapr committed 15 hours ago · 1 / 1 — adbfae9

feat: Add a comprehensive suite of agent skills including document processing, design assets, and utilities, and update backend modifier controllers. — Toanapr committed 16 hours ago · 1 / 1 — d5a6d15

feat: Introduce a comprehensive suite of new agent skills covering document generation, design, and web development, alongside a minor update to the menu category service. — Toanapr committed 16 hours ago — b9a855b

feat: implement optimistic UI updates for kitchen orders with WebSocket integration — JakeConal committed 17 hours ago · 2 / 2 — Verified — 5c049e3

feat: optimize api call — JakeConal committed 17 hours ago · 1 / 1 — Verified — c00dac4

feat: Implement authentication checks and redirect for kitchen staff and admin roles — JakeConal committed yesterday · 2 / 2 — Verified — 079aeb1

refactor: Remove subtitle from TopBar and clean up unused view toggle buttons — JakeConal committed yesterday · 2 / 2 — Verified — 0d8c78d

Commits on Jan 17, 2026

fix: Refine refresh token cookie settings for improved cross-site compatibility and local development. — Toanapr committed 3 days ago · 1 / 1 — d67699f

feat: Implement environment-aware cookie security settings, configure proxy trust, and improve refresh token error handling. — Toanapr committed 3 days ago · 1 / 1 — cf6ee43

Commits on Jan 16, 2026

feat: Set default payment method to 'vnpay', ensure `billRequestedAt` is present, and broadcast order updates after marking orders as paid. — Toanapr committed 3 days ago · 1 / 1 — cb2c6a1

feat: Add waiter API for marking orders as paid and update payment method options in admin and customer UIs. — Toanapr committed 3 days ago · 1 / 1 — 303b4b2

feat: Implement VNPay IPN endpoint and refactor payment integration to use numeric order IDs and configurable return URLs. — Toanapr committed 3 days ago · 1 / 1 — 6826db8

feat: Refactor menu page to include a sticky header with search/filters and add skeleton loading states for content. — Toanapr committed 3 days ago · 2 / 2 — fc00a74

feat: Update refresh token cookie settings to always be secure and sameSite=none. — Toanapr committed 4 days ago · 1 / 1 — f0c6762

chore: Remove packageManager field from package.json. — Toanapr committed 4 days ago · 2 / 2 — 94f33df

fix: Improve table form data submission by cleaning optional fields and enhancing error message parsing, and pass null for unassigned waiters. — Toanapr committed 4 days ago · 2 / 2 — d1d71c1

chore: Add packageManager field to package.json. — Toanapr committed 4 days ago · 2 / 2 — f4c72e1

feat: Implement scrollable sidebar navigation with a custom no-scrollbar utility and remove automatic database seeding from the backend. — Toanapr committed 4 days ago · 1 / 1 — 067b849

Commits on Jan 15, 2026

feat: Improve VNPay integration by cleaning and persisting order IDs for `TxnRef` generation and return processing, and updating backend order marking. — Toanapr committed 4 days ago · 1 / 1 — b16dddc

feat: enhance VNPay integration with improved transaction reference generation, IP address handling, token storage in local storage, and updated payment page UI. — Toanapr committed 4 days ago · 1 / 1 — 32e1c12

Merge branch 'main' of github.com:JakeConal/smart-restaurant — JakeConal committed 4 days ago · 1 / 1 — f4fb790

feat: enhance order tracking with served status handling and notifications — JakeConal committed 4 days ago — Verified — 8ca514c

feat: Implement VNPay payment gateway with a dedicated frontend return page and backend services for payment creation and verification. — Toanapr committed 4 days ago · 1 / 1 — 6fbe685

refactor: ProfileContent component for improved readability and formatting — JakeConal committed 4 days ago · 2 / 2 — Verified — 7c0363e

feat: enhance order management with served status handling and payment method selection — JakeConal committed 4 days ago · 1 / 1 — Verified — b146c36

feat: enhance time handling in order components and improve logout page structure — JakeConal committed 4 days ago · 1 / 1 — Verified — e2c477e

feat: remove download report functionality and associated button from ReportsPage — JakeConal committed 4 days ago · 2 / 2 — Verified — 4e4a777

feat: enhance order rejection handling with notifications and update Order interface — JakeConal committed 4 days ago · 1 / 1 — Verified — 9933f35

feat: add payment handling in WaiterOrdersPage and BillModal components — JakeConal committed 4 days ago · 1 / 1 — Verified — e79eb2b

Merge pull request #3 from JakeConal/feat/report

kyrie25 authored 4 days ago · 1 / 1 Verified a7dea00

feat: add report page
kyrie25 committed 4 days ago Verified 11c249f

feat: implement menu caching mechanism to enhance performance and reduce API calls
JakeConal committed 4 days ago · 1 / 1 Verified 6de34c4

feat: improve code readability in LoginContent by formatting JSX and enhancing structure
JakeConal committed 4 days ago · 2 / 2 Verified fc5b42b

feat: enhance total calculation logic in OrderCard and OrderDetailModal for improved discount handling
JakeConal committed 4 days ago · 2 / 2 Verified d9d8fbf

feat: introduce UI/UX Pro Max design workflow and refine global CSS transitions and component hover effects.
Toanapr committed 4 days ago · 2 / 2 467031e

feat: Redesign OrderInfoModal with enhanced UI/UX and add new UI/UX workflow documentation.
Toanapr committed 4 days ago 6b778b6

feat: Redesign cart UI/UX with item photos, new empty state, and add logout page.
Toanapr committed 4 days ago 1459f00

feat: Add Assign Waiter functionality with modal integration
Toanapr committed 5 days ago · 2 / 2 d698d1a

feat: Add password complexity validation and strength indicator in signup process
Toanapr committed 5 days ago · 1 / 1 6afc5ed

feat: Implement refresh token functionality with cookie management
Toanapr committed 5 days ago · 1 / 1 becd9e6

feat: Implement Super Admin functionality with admin management features
Toanapr committed 5 days ago · 1 / 1 5adceab

feat: enhance sorting options for menu items and categories
Toanapr committed 5 days ago · 1 / 1 43f4566

Commits on Jan 14, 2026

feat: add Bill function for invoice preview and printing
JakeConal committed 5 days ago · 1 / 1 Verified bd48a11

refactor: remove escalation feature from order management
Toanapr committed 5 days ago · 1 / 1 76cb3e5

feat: add mark as delivery button in waiter order page
JakeConal committed 5 days ago · 1 / 1 Verified 1c4156e

feat: enhance kitchen staff management and improve JWT validation logic
Toanapr committed 5 days ago · 1 / 1 f93ee8f

feat: add logout functionality to Sidebar and remove from TopBar
Toanapr committed 5 days ago · 2 / 2 150fa32

feat: enhance role-based redirection for login and admin home
Toanapr committed 5 days ago · 2 / 2 ce4a466

feat: add kitchen sound notification and highlight orders exceeding item's prep time
JakeConal committed 5 days ago · 1 / 1 Verified 975ed3a

feat: implement restaurant-specific WebSocket connections and order handling
JakeConal committed 5 days ago · 1 / 1 Verified 423c96b

feat: update role-based access for WaiterOrdersPage and Sidebar to include ADMIN role
JakeConal committed 5 days ago · 2 / 2 Verified 5d1ced4

feat(backend): add example env
kyrie25 committed 5 days ago · 1 / 1 Verified 3f50050

chore: remove conflicting lock file
kyrie25 committed 5 days ago · 2 / 2 Verified 6163ef8

fix(eslint): update ESLint configuration to include TypeScript parser and options
Toanapr committed last week · 2 / 2 — f5db2bf

refactor: remove avatar_url from KitchenStaff and Waiter interfaces and related components
Toanapr committed last week · 1 / 1 — b0a6165

feat: add kitchen staff management feature
Toanapr committed last week — f1bbbfa

feat: add waiter management functionality
Toanapr committed last week · 1 / 1 — a74d4f2

fix(sidebar): restrict waiter orders and tables visibility to WAITER role only
Toanapr committed last week · 2 / 2 — 05d4760

Commits on Jan 13, 2026

feat(order): add special requests field and update related components for better order handling
JakeConal committed last week · 2 / 2 — Verified — 687f192

feat(payment): enhance payment flow with support for multiple unpaid orders
JakeConal committed last week · 2 / 2 — Verified — 28fa000

feat(kitchen): implement kitchen order management and status updates
JakeConal committed last week · 1 / 1 — Verified — 1bb71c8

refactor: remove unused components and modals
JakeConal committed last week · 2 / 2 — Verified — ac96c49

feat: add functionality to send and receive orders via websocket.
JakeConal committed last week · 1 / 1 — Verified — 2d61e25

Commits on Jan 12, 2026

feat: Implement soft delete for menu categories and add remove functionality
JakeConal committed last week · 1 / 1 — Verified — d2eacf3

feat: Add CustomerJwtStrategy for handling customer JWT authentication
JakeConal committed last week · 1 / 1 — Verified — 1d414a8

feat: Enhance popularity score management by adding update functionality and adjusting scores on review changes
JakeConal committed last week — Verified — 3228d98

feat: create Tailwind CSS configuration with custom theme and animations
JakeConal committed last week — Verified — 239607f

feat: Implement role-based redirection in login and enhance waiter pages with improved layout
Toanapr committed last week · 2 / 2 — 3b5af93

feat: Update Sidebar to display user role dynamically and restrict admin menu items
Toanapr committed last week — 15c1b81
